Connecticut Occupational Medicine Partners, LLC

Connecticut's premier occupational health and medicine network.

Striving To Be the Best in Occupational Health

Connecticut Occupational Medicine Partners, LLC (COMP) was established in 2000 and since then has grown to eight occupational health clinics – helping over 10,700 employers throughout Connecticut to date.

COMP is the premier occupational health & medicine clinic network in the state. We specialize in and are dedicated solely to the treatment of work-related injuries and illnesses. Our goal is to return employees back to functional work and their private lives through specific treatment plans as soon as possible. Our network includes orthopedic providers, neurosurgeons, and other specialists to insure timely referrals, diagnosis confirmation and other related needs like diagnostics. On site physical therapy, X-ray and lab services are available at most locations.

Who We Serve

We work collaboratively with employers, insurance carriers, municipalities and TPA's, providing a host of pre-employment and post-injury management services. Together we identify and facilitate return to work timely and safely, promoting modified-duty opportunities.

Our Strengths

With a strong foundation in prevention, health, and safety for employees, COMP has partnered with business and industry in order to provide comprehensive and specialized care.

We are a multi-functional network specializing in Occupational Medicine, injury management, rehabilitation, drug testing and pre-employment exams.

Our clinics provide pre-employment physical examinations, urine drug screening collections, audiograms, hearing-conservation programs, spirometry, breath alcohol testing and a large variety of other services, including IMEs, FCE's and peer reviews.

We offer a random pool consortium to keep employers in compliance with DOT regulations.

While we are patient advocates, COMP also remains sensitive to the needs of the employer by following established clinical guidelines, early intervention in injury care, and aggressive rehabilitation. Interfacing with the employer and employee enables quick recovery and eliminates unnecessary medical services.

Why Use COMP?

Through our network of eight clinics we serve a large segment of Connecticut. Our physicians are board certified in Occupational Medicine or Emergency Medicine, which allows us to deliver superior service, accelerated return to work and cost-effective outcomes.

We see great opportunities to better integrate evidence-based principles into injured workers' treatment. Using Evidence-Based Medicine Guidelines creates enhanced outcomes for injured workers, employers and workers' compensation payers when the guidelines are followed.

Most of our clinics have on-site physical therapy available, thus making it easier for the physical therapist and physician to communicate about the injured worker's status.

We Can Help You Achieve:

- Reduced workers' comp costs
- Reduced injury related lost work days
- Improved workplace compliance
- Reduced workplace injuries
- Increased employee productivity
- Timely appointments, communication and return to work
